PROJECTS

Nutrition App

GitHub | Demo https://github.com/AndyLequ/nutrition-app-web-version

- Tech Stack: React/React-Native, Javascript, Node/Express, Tailwind
- Designed and built app that queries a public api for food data, expressing that to the user through visualizations and logs. Served the frontend web version on render as well as deployed a separate backend to handle queries.

Asylum Data App

GitHub | Demo https://github.com/AndyLequ/asylum-hrf-fe-starter

- Tech Stack: HTML/CSS/Javascript, Node/Express, Tailwind
- Built frontend that is capable of fetching data for visualizations as well as styling with tailwind to organize elements.
- Configured authentication using the auth0 microservice

Experian Ticket Resolution Optimization | Python | Algorithms

- Designed an algorithm to organize physical assets, improving ticket closure efficiency by 15% quarterly.
- Automated troubleshooting workflows using macros, reducing resolution time by 10%.

EXPERIENCE

Field Service Technician

Experian | Remote

March 2022 – January 2023

- Provided first-level technical support, resolving hardware/software issues for end-users.
- Streamlined asset tracking systems to reduce ticket backlogs.

Google Cloud Engineer

HCL (Unilever Contract) | Remote

September 2021 – February 2022

- Collaborated with cross-functional teams to design and deploy scalable GCP infrastructure.
- Delivered cost analysis reports to justify cloud migration decisions.

Accounting Assistant

Huu Suong Real Estate, LLC | Dallas, TX

January 2018 – December 2019

- Managed financial records for 2 rental properties, including tax filings and bank reconciliations.
- Processed $10k+ in monthly expenses for maintenance, utilities, and remodeling.
